

SS&W™ RM1532
Entry Level Rack Mount Access Control Server

SS&W™ RM1532 Rack Mount Access Control Server

The RM1532 is an ideal low cost server for small access control systems on a budget. Flexible driver options allow this server to be configured with either Windows XP Profession/Vista or Windows 2003/2008 Server, making the RM1532 a great choice for small to midsized access control server requiring a rack mount form factor. This Intel bases server also comes standard with powerful disk imaging software and backup solution as well as remote management and proactive monitoring tools which drastically reduce the need for onsite service calls.

- Full Three Year Warranty
- Authentic Intel Server
- Extremely Short 20" Rack Mount
- Proactive E-mail Alerts on System Trouble
- Secure Remote Management
- Remote system start and reboot
- Reduce on-site service calls by 80%
- Works with all major Access Control Systems
- Adds value to any security system

SS&W RM1532 Server

System Benefits

System Benefits	
Reliability and Long Life	Authentic Intel Server
Built in Backup and Disaster Recovery Solution	Paragon's award winning Drive Backup disk imaging software protects against multiple failure scenarios including failed hard disk, database corruption, bad software updates and more.
Integrated Proactive Monitoring	Systems can send alerts over the network or E-mail or text message if the system needs attention.
Remote Administration, Maintenance & Service	Intel AMT™ systems reduce onsite visits by allowing secure remote monitoring and response capabilities.
Remote Bios, Operating System and Software Upgrades	Keep systems up to date without the need for an onsite visit.
Remote Power Management	Restart crashed or locked up applications remotely. Even power machines on which are powered off.

Product Brief

SS&W™ RM1532 Entry Level Rack Mount Access Control Server

Available Operating Systems

Windows XP Professional or Window Vista
Windows Server 2003/2008

Syam Software™

The Syam Client products allow administrators to manage one system at a time free of charge. System Area Manager unlocks the power and rich feature-set of our products, allowing administrators to manage multiple systems simultaneously.

All products draw on a common interface that is easy to use, web-based, and works seamlessly in both Windows and Linux environments across all brands of hardware.

Paragon Drive Backup™

Drive Backup software provides disk imaging and file based back up for complete backup solution. Image to hidden partitions on hard drive or to CD, USB or network and restore entire system in minutes.

RM1532 ACS Server	Specification
Processor	Minimum Pentium Dual Core (up to Quad Core Xeon)
Memory	1 GB 667MHz DDR2 (up to 8 GB)
Hard Drives	2 x 80GB Hard Disk Drive RAID 1 (larger drives available)
Video	Integrated
Power	350 watt
16x DVD-ROM Drive	Slim line DVD/CD RW
Network	2 x Intel® Gigabit Ethernet connections
OS	Microsoft Windows XP Professional/ Vista or Server 2003/2008
Software Bundle	Paragon Drive Backup, Syam Client License (Server Versions Optional)
USB	One in front panel, two from back, two internal
Power Management	ACPI (Advanced Configuration and Power Interface) power management
Hardware Monitor Subsystem	Voltage sense to detect out of range power supply voltages Thermal sense to detect out of range thermal values Fan sense inputs used to monitor fan activity
Dimensions	1.68"(H) x 16.93"(W) x 19.92"(D)
Warranty	3 Years system components, 5 Years Hard Drives
